PROFESSIONAL SUMMARY

Frontend Engineer with **2+ years** of experience building scalable, high-performance web applications using **React.js, Next.js, and TypeScript**. Proven expertise in state management (Redux Toolkit, Zustand, Context API), RESTful API integration, and advanced performance optimization — delivering up to **40% faster render times** and serving **300+ daily active users**. Strong collaborator with cross-functional teams; passionate about clean code, component-driven architecture, and user-centric UI engineering.

EXPERIENCE

Frontend Developer <i>Tata Consultancy Services (TCS)</i>	Dec 2023 – Present <i>Powai, Mumbai</i>
- Developed and maintained 2+ production React.js & TypeScript applications; architected reusable, scalable UI component libraries using React Hooks, lifecycle patterns, and HTML5/CSS3/ES6+, reducing development time by 25%. - Managed application state using Redux Toolkit, Zustand, and Context API, achieving 30% faster page loads for 300+ daily active users; handled async data fetching with Axios and streamlined API response caching. - Integrated RESTful APIs with error-boundary patterns, reducing data fetch latency by 20%; collaborated with backend engineers, UI/UX designers, and product managers to deliver features on schedule. - Applied lazy loading, code splitting, and memoization, achieving 40% faster render times; enforced TypeScript strict mode, wrote Jest unit tests, and ensured cross-browser compatibility with full mobile responsiveness.	
Software Engineer Intern <i>Software Complete Solution Tech</i>	Jun 2019 – Jul 2019 <i>Kalyan, Maharashtra</i>
- Built 15+ dynamic pages and modules for 3 client applications using JavaScript, jQuery, HTML5, and CSS3; delivered authentication, forms, and dashboard features. - Enhanced 10+ MySQL queries, improving database response time by 30%; executed AJAX interactions reducing full-page reloads by 40%.	

PROJECTS

Codersz <i>Next.js, TypeScript, Node.js, MongoDB, OpenAI API, Socket.io</i> Live	2025
- Engineered a full-stack collaborative code editor with AI assistance; executed OAuth integration via NextAuth (Google & GitHub) with JWT sessions, a dynamic theme engine, shareable links, and user persistence layer. - Integrated OpenAI GPT API for context-aware code generation and debugging; built scalable backend APIs for secure compilation requests and real-time collaboration using Socket.io.	
Trello Clone <i>React.js, TypeScript, Express.js, MongoDB, Redux Toolkit</i> Live	2024
- Built a full-stack task management app with boards, lists, and cards; designed RESTful APIs for CRUD operations and inter-list movement with optimistic UI updates using Redux Toolkit. - Engineered drag-and-drop with dynamic state synchronization; structured MongoDB schemas for relational-style mapping and deployed frontend on Netlify with secure API handling.	
Scroll Master <i>JavaScript (ES6+), Chrome Extension API, HTML5, CSS3</i> Live	2024
- Developed a productivity Chrome Extension with popup UI, background service workers, and content scripts for DOM manipulation; published on the Chrome Web Store. - Applied cross-origin message passing, secure chrome.storage.sync handling, and REST API integration for real-time data fetching across browser tabs.	

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL
Frontend: React.js, Next.js, Redux, Redux Toolkit, Zustand, Context API, Tailwind CSS, Material UI, Bootstrap, Sass/SCSS
Core Web: HTML5, CSS3, Responsive Design, Cross-Browser Compatibility, Chrome Extension API
Backend & APIs: Node.js, Express.js, REST APIs, Axios, Async/Await, JWT, NextAuth, Client-Server Architecture
Build & Test: Vite, NPM, Webpack, Jest, Mocha, SSR, SSG, Code Splitting, Lazy Loading
Database: MongoDB, PostgreSQL, MySQL
Cloud & DevOps: AWS, Docker, Vercel, Netlify, Supabase, Git, GitHub
Other: OpenAI API, LLM Integration, Prompt Engineering, LangGraph, jQuery, Web Performance Optimization, SEO

EDUCATION

University of Mumbai <i>Bachelor of Engineering in Computer Engineering – CGPA: 9.57/10</i>	Navi Mumbai, Maharashtra 2023
MSBTE <i>Diploma in Computer Engineering – 88.69%</i>	Thane, Maharashtra 2020

ACHIEVEMENTS

400+ LeetCode Problems Solved – Consistent problem-solving in algorithms and data structures.
AMD AI Hackathon @ IIT Bombay – Built an agentic LLM workflow using LangGraph and Meta-Llama-3.1 to streamline meeting scheduling and resolve conflicts of unavailability.
SEO Growth – Boosted organic traffic on goldratepune.com to 100K+ monthly impressions via WordPress SEO optimization.
